It is certified that error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

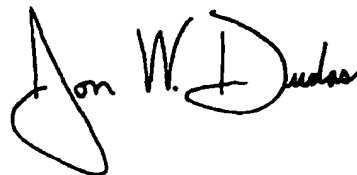

Column 8,

Line 1, should read:

-- 6. A telecommunications access terminal, wherein the access terminal connects a plurality of twisted pairs with a telecommunications network, comprising:
a metal enclosure enclosing a plurality of binding posts;
a plurality of binding posts connected to the plurality of twisted pairs; and
a twisted pair status indicator, wherein the twisted pair status indicator is attached to the access terminal, and wherein the indicator comprises
a first indicator means for indicating that at least one of the plurality of twisted pairs is available,
a second indicator means for indicating that none of the plurality of twisted pairs is available,
a sliding mechanism for sliding from a first side of the indicator to reveal the first indicator means and for sliding to a second side of the indicator to reveal the second indicator means, and
a locking mechanism attached to the sliding mechanism to prevent the sliding mechanism from moving unless the locking mechanism is unlocked. --.
